

WEEE, RoHS & REACH Compliance

WEEE Compliance Statement

The WEEE directive (Waste from Electrical and Electronic Equipment) requires that manufacturers of electrical and electronic equipment who sell into EU countries label their equipment to notify customers that it needs to be recycled, and ensure that their products are appropriately disposed of or recycled at the end of their lifespan. Products labelled with the WEEE symbol (a crossed out “waste bin”) indicates that the final user should not discard the product along with household waste, but that it must be treated separately. For collection and return of our products, please contact your local Mecmesin representative.

RoHS / RoHS2 / RoHS3 Compliance Statement

The original RoHS is EU Directive 2002/95/EC pertaining to the Restriction of Hazardous Substances in Electrical and Electronic Equipment (EEE). EU Directive 2011/65/EU (RoHS2) is an updated / recast version of RoHS, and EU Directive 2015/863 (RoHS3) adds four substances to the list.

Based on information obtained from our component suppliers, to the best of our knowledge products manufactured by Mecmesin do not contain the substances listed in the table below in concentrations greater than the listed maximum value.

The restricted substances and maximum concentration values banned under RoHS are:

Substance	Maximum Limit (ppm)
Lead (Pb)	1000
Cadmium (Cd)	100
Mercury (Hg)	1000
Hexavalent Chromium (Cr6+)	1000
Poly Brominated Biphenyls (PBB)	1000
Poly Brominated Diphenyl ethers (PBDE)	1000
Bis (2-ethylhexyl) phthalate (DEHP)	1000
Butyl benzyl phthalate (BBP)	1000
Dibutyl phthalate (DBP)	1000
Diisobutyl phthalate (DIBP)	1000

REACH Compliance Statement

The requirements of REACH registration of substances which are used in the manufacturing of articles do not apply to Mecmesin’s operations. Mecmesin’s products are “articles” as defined by REACH but do not release substances under their normal use. Suppliers of articles must provide recipients with information on Substances of Very High Concern (SVHC) if present above a concentration limit of 0.1% on an article level. Mecmesin products do not contain any of the currently listed SVHC’s.
